Professional Summary

Full Stack Developer with 4.8 years of experience designing and delivering scalable, secure enterprise web applications using **Next.js, React, NestJS, TypeScript, and PostgreSQL**. Proven track record of building high-performance solutions across **government, insurance, and retail/consumer domains**, including a WCAG 2.1 AA–compliant citizen portal serving 1M+ monthly users. Experienced in **AWS, Azure DevOps, CI/CD, and AI-assisted** development, with a strong focus on performance, accessibility, and scalable system architecture.

Technical Skills

- **Frontend:** React.js, Next.js, Redux, React Query, Tailwind CSS, Styled Components, WCAG 2.1 Accessibility
- **Backend & DB:** NestJS, PostgreSQL, JWT, RESTful API, RBAC, WebSockets, Redis
- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Java, Python
- **AI:** GitHub Copilot, Claude CLI, OpenAI API, Vercel AI SDK
- **Cloud & Deployment:** AWS (S3, Amplify, App Runner, Lambda, IAM, CloudFront, API Gateway), Azure, CI/CD Pipelines, GitHub Actions, Docker, Vercel, Kubernetes
- **Testing & Debugging:** Postman, Swagger, Lighthouse, Axe Accessibility Tools
- **Tools & Practices:** Agile/Scrum, Git, Bitbucket, Jira, Confluence, Azure DevOps, ServiceNow

---

Experience

IBM- Package Consultant (Jun 2026 - Present)

- **Nestle, Europe (Full Stack Developer | June 2026 - Present)**
  - Developed AnalyzeIT, an enterprise web application **using Next.js, React, TypeScript, and Ant Design** to analyze high-density consumer product sales and customer sentiment data.
  - Built a client-side **analytics engine** supporting All type of Analysis, and Regression, with 10+ interactive **Chart.js visualizations** for business reporting.
  - Architected the application's core state management and typed domain model, enabling a scalable **9+ tab workflow** for reports, datasets, and statistical analyses.
  - Integrated Excel import/export (SheetJS) and REST APIs with an external survey platform, implementing robust data mapping and efficient handling of large-scale datasets with real-time synchronization.
  - Implemented **Azure AD SSO** (MSAL) and deployed the application to a Windows/IIS environment using iisnode

Wipro Limited – Project Engineer (Jul 2022 – May 2026)

- **Ministry of Transportation, Ontario (Full Stack Developer | Feb 2024 – May 2026)**
  - Built **citizen-facing and internal Next.js** portals from scratch used by 1M+ monthly users across Ontario using **SSR and middleware**-based architecture.
  - Designed and implemented **end-to-end RBAC** and User Access Management (UAM), securing authorization across multiple enterprise modules.
  - Raised **Lighthouse accessibility** scores by engineering WCAG 2.1 AA compliant React components with semantic HTML and ARIA roles, enabling full assistive-technology support and passing government compliance audits.
- **Suncorp Insurance, Australia (Backend Developer | Jul 2022 – Jan 2024)**
  - Developed and maintained **Node.js RESTful APIs** powering internal enterprise workflows for Suncorp's operations team across production environments and maintaining structured logs using **winston**. Triaged and resolved production incidents via **ServiceNow**, tracking change requests (CRs) for deployments.
  - Monitored application health and server performance using **Dynatrace** (server & URL monitoring), identifying issues proactively before user impact.
  - Automated recurring operational jobs and scheduled workflows using **Control-M, Windows Task Scheduler, and PowerShell scripts**, reducing manual monitoring effort by ~50% and eliminating repetitive daily operational checks across production environments.

- **Wipro – Velocity Program (StackRoute Java Full Stack Training | Jan 2022 – Jun 2022)**
    - Completed **6-month intensive Java Full Stack training** focused on enterprise-grade application.
    - Built end-to-end applications using **Java, Spring Boot, MySQL, React, CSS, JavaScript**.

Education: B. Tech in Computer Science -- Presidency University Bangalore | 2022

Key Projects:

SSMMA — Product Management System | Next.js, TypeScript, PostgreSQL, Prisma, Redis, RabbitMQ, Cloudinary | Full-stack platform with RBAC, cart/order management, bulk uploads, PDF catalog generation, email notifications & JWT auth | ssmma.shop

Web Dev Explorer — Interactive developer reference covering 150+ concepts (React, Next.js, JS, TypeScript) with a live code playground | Next.js 14 (App Router), TypeScript, Tailwind CSS, Vercel | chaitanyakumar.online

---

Certifications:

AWS Cloud Practitioner (2023)
Azure Fundamentals (2022)
GitHub Copilot (2025)
Gen AI L1 & L2 (2025)
Devops Implementation (2025)
SQL Beginner to Advance (2026)
